PROUD SPONSOR

The VELUX Skylight Guarantee

Three patented layers of water protection work together to ensure your VELUX skylight will hold up in all weather conditions.

Our skylight warranty is our commitment that VELUX skylights installed with our flashing will stand strong in all types of weather. We're able to make this commitment with a 10-year installation warranty backed by our patented three layers of water protection on deck- and curb-mounted skylights.

- 1 Pre-Attached Seal**
Pre-attached deck seal (deck-mounted) or gasket (curb-mounted) provides a tight seal for leak-proof installation.
- 2 Adhesive Underlayment**
Adhesive underlayment for secondary water protection against the harshest weather conditions.
- 3 Engineered Flashing**
Engineered flashing for easy installation and primary water protection. See page 24 for flashing systems.

Deck-Mounted Skylights

Explore our range of classic deck-mounted skylights, including solar, electric, and manual versions. Deck-mounted skylights attach directly to your roof with no need for a curb, resulting in a quick, seamless, and watertight installation.

Self-Flashed Skylights

The VELUX product line of self-flashed skylights differ from both deck- and curb-mounted skylights because their curb and flashing are built into the skylight and come with a watertight seal. These skylights are ideal for thin roofing materials like asphalt and shingles and are ready to install straight out of the box.

E-Class PVC Flashed

Metal Flashed

EVMS

B C D E

Solar-Powered Fresh Air Skylight

- Solar-powered battery control system easily opens and closes skylight with remote or smartphone app
- Rain sensor automatically closes skylight at the first sign of rain
- Easy installation, no sealants or mastic required
- Available in custom sizes

EV

C D E

Manual Fresh Air Skylight

- Manually open and close the skylight with smooth-turning handles or control rods
- Integrated PVC flashing
- Easy installation, no sealants or mastic required
- Available in standard and custom sizes

EF

A D E

Fixed Skylight

- With no mastic, step-flashing, or sealants, skylight is ready to be installed right out of the box in as little as 30 minutes
- Larger glass area delivers up to 22% more daylight compared to similar models
- Available in standard and custom sizes

QPF

A

Fixed Skylight

- Clean exterior profile provides natural light and sky views without obstructing the roofline
- Pre-finished white interior wood frame
- Pre-installed metal flashing designed for sealant based installation

E-Class Custom Finish Colors:

VELUX Grey finish standard. Other custom finish colors are available.**

A Add a pre-installed solar shade:

Harness the power of the sun and control the amount of daylight entering through the skylight.*

¹**In-Stock:** Solar skylight shades available for factory installation, 2-4 business days. Custom sizes must be placed as special order. Manual roof window shades not eligible for factory installation. ²**Special Order:** No factory installation for special order skylight or roof window shades. Shades ship separately: skylights 14 business days and roof windows up to 8 weeks. ³ GDL requires two shades, one each for top and bottom windows.

Simple control of all VELUX skylights and shades with one remote.

The Touch remote controls both skylights and shades, featuring ventilation timing and programmable presets.

We believe it should be easier to create your perfect home environment with VELUX skylights and shades. Now, with VELUX Touch, you only need to reach for one remote to take control of every skylight and shade you install. Talk about indoor comfort right at your fingertips!

- Remote operation in room where your skylights are installed
- Operate multiple products at once
- Group skylights and shades to operate together
- Set the ventilation timer for regular automated home airing
- Lock home option to securely close all your skylights automatically
- Preset shade and skylight positions for even easier operation

Sun Tunnel® Skylights

Adding Sun Tunnel® skylights is a cost-effective way to add natural light to areas that need a brighter, more vibrant appearance. Their low-profile design creates a sleek appearance on any roofline, and their pre-fabricated light tube makes them quick and easy to install. Not to mention, they come with a 20-year tube warranty.

VIEW FULL BROCHURE

Domed

TGF (flex) / TGR (rigid)

Low-Profile

- Angled dome is ideal for south-, west-, and east-facing roofs
- Parallel design to blend with roofline

TMF (flex) / TMR (rigid)

Pitched

- Raised dome allows for consistent light distribution throughout the day
- Provides straighter tube run through most roof pitches

TCR

Curb-Mount

- One-piece metal, curb-mounted flashing
- Ideal for low roof slopes, and tile or metal roofs

Flat Glass

TLR

Low-Profile

- Low profile glass design for a sleek appearance
- Perfect where local ordinances prohibit acrylic domes on roofs

TZRQ

Pan-Flushed

- For shingle roofs
- Glass options include tempered **fireproof** diamond wire or laminated **hurricane**

TZR / TZRL

Curb-Mount

- For tile or shingle roofs – TZRL includes flashing kit for shingled roofs
- Glass options include tempered **fireproof** diamond wire or laminated **hurricane**

Accessories:

Ceiling Rings and Frosted Diffusers

Electric Light Kit

Energy Kit

Daylight Controller

Free light.
Day or night.

Designed to fit inside the rigid tube of a VELUX Sun Tunnel® skylight, the **VELUX Solar Night Light** gives off a soft, soothing glow from above when natural light isn't available. The night light's solar panel collects available sunlight, even on cloudy days, to power its rechargeable batteries.

Other Accessories: Diffusion enhancer, additional rigid tube sections and elbows, suspension wire kit, exterior fire band, vapor barrier, flashing kits.

* Roof deck rough opening height dependent on roof pitch, refer to installation instructions for proper measurement. ** Including roofing materials.

Fireproof tempered diamond wire glass meets Class A Burn Brand Test ASTM E108. Laminated hurricane glass meets Florida Product Approval #6393.

Architectural Skylights

The VELUX line of architectural skylights is made up of lightweight, metal-framed structural skylights available in fully customizable configurations, finish colors, and glazing options.

As part of the architectural line, our modular skylight system can be configured to a range of different daylight solutions while offering several features for climate control, ventilation, and shading.

Custom Structural Skylights

Square Pyramid

Polygonal Pyramid

Extended Pyramid

Single Pitch

Double-Pitch

Low Profile

- Create spectacular daylighting applications with unlimited design capabilities
- Lightweight, metal-framed skylights capable of spanning up to 40 feet wide
- Insulated glass panels help control heat gain and loss in all types of weather
- Available in a wide variety of high-performance glass and finish colors

Flashing Systems

Deck-Mounted, Curb-Mounted

VELUX Skylight Flashing Kits are a crucial part of our complete system designed to shed water without relying on sealants that can break down over time. No matter the scope of your project, we offer a variety of skylight flashing systems to ensure a weather-tight fit for virtually all roof types and slopes so you can easily install the skylight of your dreams.

Deck-Mounted Flashing Systems

Each of our deck-mounted flashing systems is made up of a pre-attached deck seal, adhesive underlayment, and engineered flashing. They attach directly to your roof deck and interweave with the roofing material to ensure your skylight will hold up in all weather conditions.

Curb-Mounted Flashing Systems

VELUX curb-mounted skylights have a pre-attached skylight gasket, which provides a tight seal between the site-built curb and skylight. When combined with our curb-mounted engineered flashing and adhesive underlayment, they create a seal to ensure your skylight will hold up in all weather conditions.

3 Types of Installation

Deck-Mounted, Curb-Mounted, Self-Flashed

When it comes to skylights, there are three different types of installation methods. To know which installation is right for a home, a skylight installer or roofer will evaluate the home's roof pitch, roof material, ceiling type, and whether this is a replacement job or a new cut-in. But whatever the method, you're installing the same great skylight that brings in plenty of natural light and fresh air!

1 Deck-Mounted Skylights

Deck-mounted skylights allow your skylight to have a low profile on your roof and create an energy-efficient installation. With this installation, your skylight is nailed directly to the roof-deck. Deck-mounted skylights are ideal for new construction homes or for brand new cut-in skylights.

2 Curb-Mounted Skylights

Curb-mounted skylights are the most common installation preference in low-pitch or flat-roof situations. The "curb" is a frame built mostly of two-by-fours that are attached to the roof. The skylight is then installed on top of the curb. You can imagine it as a shoebox: the curb is the box and the skylight is the top.

3 Self-Flashed Skylights

Self-flashed skylights differ from both deck- and curb-mounted skylights because their curb and flashing are built into the skylight. No extra flashing kit is needed. The skylight sits directly over the rough opening in the roof deck and is then sealed.

A Skylight for Every Ceiling

Flat, Attic, Cathedral, Vaulted

Have you considered installing a skylight, looked up at your flat ceiling, and thought that there's just no way? You're not alone! One of the most common misconceptions about skylights is that they can only be installed in homes with vaulted ceilings. But we're here to tell you that's not the case.

Flat Ceiling

If you have flat ceilings, once your skylight is set outside, your installer will construct a drywall light shaft inside. This shaft directs daylight to the room below while hiding the attic space between your ceiling and roof.

Cathedral Ceiling

The advantage to cathedral ceilings during skylight installation is that without attic space between the roof and your home's interior, there's no need for a light shaft. So, once your skylight is installed, the work's all done.

Vaulted Ceiling

Although similar to a cathedral ceiling, vaulted ceilings feature a single sloping side or arched slope. This style may require a light shaft to be created between your ceiling and roof for the skylight.

Attic

Even if your attic has obstacles like HVAC units, you can still add natural light to your home. Sun Tunnel® Skylights fit between ceiling supports, allowing light to fill the space below uninhibited.

Flat Roof & Ceiling

Like a cathedral ceiling, flat ceilings under flat roofs can easily accommodate both skylights and Sun Tunnel® skylights. Depending on your attic space, a small light shaft may be needed to complete the installation.

ENERGY STAR®

One of the most straightforward ways to help meet energy codes as a builder or architect, while still designing bright, airy buildings, is to specify ENERGY STAR® certified products.

Many VELUX residential products are ENERGY STAR® certified, which means they meet energy efficiency standards set by the US Environmental Protection Agency (EPA). In order to be ENERGY STAR® certified, fenestration products must have their U-factor, Visible Transmittance, and Solar Heat Gain Coefficient ratings independently tested and approved under the FenStarSM Certification Program of the National Fenestration Rating Council (NFRC) to qualify.

By using ENERGY STAR® certified products, architects and builders can use skylights to bring much needed daylight and fresh air inside, allowing them to create more attractive buildings and more livable spaces while still meeting local energy codes.

In warmer climates, there is great potential for lighting energy savings by using emerging control technologies like VELUX ACTIVE or more effective daylighting products like VELUX skylights with shades and Sun Tunnel® skylights.

- To qualify for the VELUX 10-year installation warranty, VELUX flashing must be purchased. The 10-year installation warranty excludes EVMS, EV, QPF, EF, GSM, FXG, CFU, CXP.
- VELUX shades are not available for any VELUX custom-sized skylights. VELUX shades when purchased with a standard size accessory tray are available for select E-Class skylights.
- Consult local code officials regarding egress requirements as they may vary by jurisdiction.

Code Compliance

VELUX offers a broad array of skylights, roof windows, and Sun Tunnel® skylights that meet the applicable performance requirements and testing and labeling standards written into the most current US Model Codes:

- 2021 IBC (International Building Code)
- 2021 IRC (International Residential Code), and
- 2021 IECC (International Energy Conservation Code),
- As well as local and regional codes based on the above codes.

Additionally, electrical components built into VELUX products are UL listed.

Standard VELUX residential skylights and Sun Tunnel® products meet the current and prior North American Fenestration Standards (NAFS), also known as AAMA/WDMA/CSA 101/1.S.2/A440. Copper-clad versions may not exceed these requirements but do meet other standards required of them.

To verify these attainments on-site, the products are shipped with all required labels to expedite the inspection and final acceptance process. VELUX confidently certifies through these labels that only products consistent with the tested specimens are sent to the job.

Warranty

For over 80 years, VELUX has been dedicated to producing skylights that are synonymous with quality and reliability. Our commitment to you does not end once your skylight is installed.

The VELUX deck- and curb-mounted product family carries a 10-year installation warranty when installed with VELUX flashing, plus 20 years on glass seal failure, 10 years on product, and 5 years on shades and controls.

The 10-year installation warranty does not apply to VELUX products purchased prior to January 1, 2010. Other exclusions apply, see full warranty for details.

MORE INFORMATION

NOTICE: ALL GLASS MAY BE SUBJECT TO UNEXPECTED AND SPONTANEOUS BREAKAGE in rare circumstances due to imperfections in the glass that are undetectable during the manufacturing and inspection process by the manufacturer of the glass and VELUX.

VELUX offers the choice of laminated or tempered glass skylights. Impact glass and comfortplus glass are all types of laminated glass. Comfort glass is a type of tempered glass. Laminated glass is a combination of two or more glass sheets with one or more interlayers of plastic (PVB) or resin. In case of breakage, the interlayer is designed to hold the fragments together. Tempered glass does not contain an interlayer to hold the fragments together. Instead, tempered glass is designed to break into small, pebble-like pieces. When tempered glass breaks, pieces of glass come loose and may strike an individual.

CONSULT LOCAL REGULATIONS AND/OR BUILDING MATERIAL CONSULTANTS TO DETERMINE WHICH TYPE OF GLASS IS RIGHT FOR YOU OR IF LAMINATED GLASS IS REQUIRED IN YOUR APPLICATION.

All VELUX skylights, roof windows, Sun Tunnel® skylights, flashing kits and shades must be purchased through a qualified VELUX dealer. Please see the "Where To Buy" section of veluxusa.com website for a list of VELUX dealers near you.

Transforming spaces since 1941. For over 80 years, VELUX has helped people envision and achieve the transformation of spaces using daylight and fresh air through the roof. Our product program includes skylights, Sun Tunnel® skylights, decorative shades and roof windows, as well as installation and smart home solutions. By creating brighter, healthier, more sustainable places to live, work, learn, and play we enable a better everyday life for people around the world. We work globally with sales and manufacturing operations in more than 40 countries and around 11,500 employees worldwide. The VELUX Group is owned by VKR Holding A/S, a limited company wholly owned by non-profit, charitable foundations (THE VELUX FOUNDATIONS) and family. For more information, visit veluxusa.com.
